Data analysis

Users choose their own time

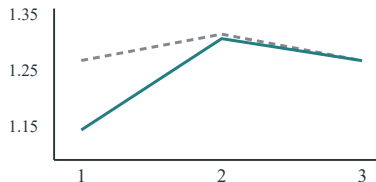

Maximize individual net utility

Bill + delay + switching + congestion

Example: release 1, deadline 3

User 37: utility at manufacturer B

Before (dashed); after (solid)

Chosen time: period 1 to period 2

Competing manufacturers

Manufacturer A

Set period prices
Reference capacity: 30

Manufacturer B

Set period prices
Reference capacity: 12

User choices

Price competition

Direct access; intermediary is an extension

Posted prices and load-dependent QoS
